

## **New Day (Break it Down)**

The sun rises on the daily - a new day  
To cope with trials and tribulations - a new way  
Some stop asking, some chase answers  
Some of us are lookin' for the truth in a mantra.

Symmetry, patterns wide and diverse  
Creature, creator – who was there first  
They say knowledge is king, then what's a king to believe?  
A wise man knows there's things we can't see  
With eyes wide open, the horizon closed-minded  
Only thinkin' 'bout profits from our grind that spellbind(s) us  
There's gotta be more to this, we all know it  
And we're all a part of this: Solution and problem?  
Loose connection, who's willing to work, the context  
For a better understanding – some say that that's what it's all about  
And we ain't goin' anywhere till we figure it out!  
BREAK IT DOWN

(Come on)

A random coil, a native state  
Changing, altering, shifting shape  
(Break it down)

A random coil, a native state  
Changing, altering, shifting shape  
Break it down

(Come on)  
Everything's connected (worry, problems, struggle, suffering)  
Everything's connected (sickness, pain, growth, change)  
Everything's connected (fear, hope, repair, damage)  
Everything's connected (light, darkness, questions, answers)  
Break it down

That's more than I can understand  
Ain't I supposed to keep my humble self  
They say there's a lot of places I should go –  
I've been a lot of places, still I wanna know  
Who I'm fightin' for, every single day  
Cuz what I do is not to be in vain  
Trace me, guide me, help me, stay  
Show me where and I'm on my way

It's a jungle in there (upstream)  
It's a jungle in there (downstream)  
It's a jungle in there (upstream)  
It's a jungle in there (downstream)
